towards Russia, Turkey, and England. The cultural cohesion created by Islam that connects Chinese Turkestan with Russian Turkestan and other neighboring Muslim countries, and that created by Buddhism that connects Mongolia with Tibet through Chinghai and small areas of Sinkiang, marked the four provinces of Sinkiang, Chinhai, Kansu, and to a small degree, Shensi, as one single area which represents one administrative unit.

The Eastern Turks:

The main pattern of social life of the Eastern Turks is based primarily on "Oasis Agriculture" with its irrigational complex. All agriculture in this area is made possible through the organized use of water. The family organization among the Eastern Turks is therefore an extended one, since a certain level of productivity can only be reached through collective labor (upkeep of irrigational systems and dikes). One reason the Eastern Turks developed the extended family pattern is that the family recieves water in proportion to the amount of labor its members put into the upkeep of irrigational systems and canals; the greater the family, the more water is therefore provided for their land.

The Internal structure of the family system is not based upon clan rules. Eastern Turkic communities are governed by a body of leaders, selected from the community itself whereas the larger governmental districts are headed by Chinese officials or, at present, by Chinese Communists. A secondary aspect of Eastern Turkic social life is formed by trade and handicrafts. Merchants and craftsmen form "guilds" which in turn influence the social life of the community.

Kirghiz and Kazakhs:

Kirghiz and Kazakh society is clan-based. (The definition of the notion of "clan" is explained in the chapter about the Social Structure.) All family relationships are deeply rooted in the clan system. The main pattern of social life among these two tribes is created by their nomadic way of life, whose most essential economic activity is cattle breeding. The transition to a semi-sedentary life is now under way. The Communists insist that the Kirghiz and Kazakhs occupy a permanent winter camp site, since this facilitates better political control over the tribes. The choice of the summer camp site still remains more or less in the hands of the tribes. Kirghiz and Kazakhs are ruled by "biks," or "manaps" (elders) responsible to the Chinese officials.

The Mongols: general remarks.

Mongol social life is based on nomadic pastoralism. The basic unit is the nuclear family. A group of patrilineally

preclude their enjoying any great influence.

The Salars' pattern of social life follows the Islamic form. Patriarchy rules the extended family, whose members' main occupation is agricultural work. However, agriculture goes hand in hand with trade, which plays also a noticeable role. As a group, the Salars are economically unimportant since they form only a small Turkic tribe.

The Sarigh Uighurs:

The Sarigh Uighurs, the so-called Yellow Uighurs, are a small tribe of Turkic origin which is becoming extinct. Although immediate neighbors of the Chinese, they never learned agriculture, and remained herdsmen. Nowadays the Sarigh Uighurs are mostly hired shepherds of Chinese cattle owners. Frequently one also finds them as laborers on Chinese farms. An occasional Sarigh Uighur family owns a few cows, sheep, and horses. The smallest and the only social unit, is the patriarchal family.

The Shera Yögur:

The people belonging to this small Mongolian tribe, rapidly becoming extinct, are semi-nomadic herdsmen. The old Mongolian clan-system is still preserved. Clan exogamy exists and the migrational units are the single clans. The economic centers, however, are their Buddhist monasteries, for it is the monasteries who own the herds and not the individual tribesmen.

The Monguors:

Ethnically consisting of Mongols, Turks, Tibetans, and Chinese, speaking an old Mongolian and Tibetanized dialect, the Monguors are the only Mongolian tribe of the Northwest that shifted successfully from nomadic pastoralism to farming. They learned farming and the use of their agricultural tools for raising barley, wheat, peas, potatoes, etc., from the Chinese. However, livestock still plays an important role as the second inportant economic resource. While sheep, cows, mules, and pigs are economically important, horses are bred only because to own horses is a mark of prestige.

The basic social and economic unit of the Monguors is the extended family which is patrilineally and patrilocally oriented. The grandfather and great-grandfather enjoy authority over all members of the family. Property is collectively owned.

The families belong to a clan which is headed by a chieftain whose Chinese title is T'u-ssu, who is at the same time a Chinese official. Originally the clan chieftain was simply the head of a number of extended families, whose migrations he directed and whose highest duty was the military protection of the clan through organization and training of the men. Later

SN
563 depends on his herds: they are his only resource, his only
233 wealth, and his only pride. When two nomads meet, whether
[521] they are Kazakhs, Kirghiz, Mongols, or Tibetans, the first
[554] subject that comes up is their cattle. Among nomads, social
[422] status is established by the possession of horses, camels, and livestock in general, and only secondarily determined by titles or descent. This is especially true for the Kirghiz, Kazakhs and Tibetans, and to a lesser degree for the Mongols, among whom aristocratic birth (real or imagined) plays an important role.

SN
[342] The average nomad's life can be described as follows: he lives in a roomy felt tent, furnished with house altar, in the
[352] case of Buddhists, or with an artistically made book-stand
[353] for the Quran in the case of Muslims, and some chests and carpets. The whole family takes care of the livestock, and periodically the migration unit moves during the summer time

SN
[621] from pasture to pasture, preserving the richest and most protected grazing land for the winter time. The weather plays a fatal role in the welfare of the nomad's livestock, and every so often a migration unit (the ail, the aul, the ayir,

SN
[614] the omoq, otoq, xotn, or uruq, the ulus or even the aimaq) loses its livestock. In this case, those clans which still own
[426] enough livestock divide their herds and lend part of them to
[476] those who suffered the loss. Collective cooperation is exercised in this respect by Kazakhs, Kirghiz and Mongols, while the nomadic Tibetans, in a similar situation, have quite

SN
a reputation for robbing neighboring tribes of their livestock.

563 The nomadic way of life, the close contact with nature and
971 dependence on nature promotes animism, shamanism, and spiritualism, which goes hand in hand with the prevailing religions of Islam (in the case of the Kirghiz, Kazakhs, Salars, and some Tibetan clans) and Buddhism (in the case of the Mongols, Tibetans, and Sarigh-Uighurs). As a general rule, the nomadic Kirghiz and Kazakh are not very fanatic or ardent Muslims, and neither are the Mongols very pious Buddhists, but still, both

SN
feel strongly about their religious although they are rather lax
[792] in their observance. No matter how poor a Buddhistic nomad is, he voluntarily supports and feeds wandering lamas,
[794] invites several on major occasions (birth, death, and marriage if the bride's father can afford it), pays them, and finally is accustomed to the old tradition ot giving a small percentage of his livestock every year to Buddhistic monasteries. All nomads are very superstitious, and the relationship between cause and effect is often misinterpreted, e.g., in the case of disease or weather. It is safe to say that the dominant motives of the nomads are economic in the first place and religious in the second place.

II. The Turkic People of the Northwest

563
101 A. The New Uighurs (or Eastern Turks)

The Turks of Sinkiang call themselves after the cities where they live, e.g. Kashgarlik, Turfanlik, Kuchalik, etc.... After [668] the Communist Revolution the Communists introduced the term Uighurs for the Eastern Turks, living in the Ili District. The term 563 later was adopted by the Chinese.

144 1. Physical characteristics

In one sense the Eastern Turks are the descendants of the old [167] Uighurs who migrated to present day Sinkiang during the ninth cen- [175] tury A.D., Later they had mixed with Indo-european tribes and other Turkish tribes of the Chagatai Ulus (empire) and to a small degree also with the Mongols. Thus, in the terminology employed by E. Frhr. von Eickstedt, "Rassenkunde und Rassengeschichte der Menschheit, Stuttgart, 1934, the Eastern Turks show many europid and some turanid racial characteristics, and only a slight degree of mongoloid traits.

142 A more detailed description of the average physical type of
141 Eastern Turkestan is as follows: dark hair and eyes, (sometimes
563 lighter occasionally blue eyes), white or yellowish skin with sometimes a slight inclination to brown, middle or tall stature, on the average 1680-1700 mm., with a tendency toward obesity. The head is definitely brachycephalic with a length-width index of 85-87, a longish-oval face, with wide cheek-bones, a straight and rather prominent nose, eyes lacking the mongoloid fold, and everted lips.

2. Economy

433 The main occupations of the Eastern Turks are horticulture,
563 agriculture and animal husbandry. The Eastern Turks breed camels, horses, sheep, and goats. They are famous for their fertile fruit-orchards, which are mostly artificially irrigated. Handicraft is fairly developed, but has no economic significance.

3. Religion

771 The Eastern Turks are Moslems, adherents of the Sun sect.
563 However, they display an attitude towards religion. This does [793] not refer to the leading religious clergy who form a kind of a gentry together with the nobility of the rich landowners.

4. Social organization

178 In contrast to the Kirghiz, Kazakhs, and Uzbeks, the Eastern
614 Turks have lost their clan system and tribal organization com-
563 pletely. There is no antagonism between the Eastern Turks and
186 the remaining Turkic tribes, although the nomadic Turkic tribes
563 exhibit some contempt of the Eastern Turks. However, there is an old and remarkable hatred between the Turks and the Chinese, due partly to the greater efficiency and industriousness of the Chinese.

212 5. Literature
563 a. literacy

The Eastern Turks still use the Arabic script. Until recently
[668] there was at least 95 per cent illiteracy. The Communist regime apparently has successfuly attempted to fight illiteracy.

b. literature and folklore

538 Since Chagatai times the Eastern Turks have been the bearers
178 of an amazing literature and folklore. For over a hundred years,
563 this intellectual life has been declining. Now nothing remains but primitive samples of that literature which was so famous and influential upon various Turkic peoples.

101 B. The Taranchis
563 The Taranchis are ethnically, linguistically, culturally and
175 genetically the same as the Eastern Turks. Those New-Uighurs who were defeated by the Chinese at the middle of the 18th century and fled to the Russian part of the Ili Area, the Russians called Taranchi, a name that has remained ever since.

C. The Kazakhs

1. Origin and physical characteristics

Prior to the Russian Revolution the Kazakhs were called Kirghiz. Many times they are referred to as Kazakh-Kirghiz, or Kirghiz-Kazakhs or Kirghiz-Kaisaks. The original homeland of the Kazakhs was southern Siberia between the Yenisei River and the Ob River. According to Abulgazi and Rashideddin the Kazakhs were a very small tribe which expanded after the Mongolian conquest and after frequent mergings with Mongolian clans. This
[144] explains why the Kazakhs resemble the Mongols so much. In fact
[142] 80 per cent of the anthropological features of the Kazakhs are mongoloid, i.e. a strong and square-built trunk with relatively short legs, wide and round heads; in profile only a slight curvature of the occiput (back part of the head) can be seen; the face is wide and flat, high cheek-bones, and typical mongolian eyelid, the nose is flat, hair and eyes are black or brown, the lower jaw is wide and strongly built.

2. Social organization

a. the khanate

563 The Kazakh hordes first belonged to the Chagatai Empire and
175 later to the Golden Horde. During the sixteenth century they formed
619 their own Kazakh Khanate.

b. the tribes

563 The Kazakhs living in Sinkiang belong mostly to the Orta Dzhuz
619 (middle horde), consisting of the following five main tribes: (1) Atagni, (2) Naiman, (3) Argin, (4) Uvak-Girei and (5) Kipchak.

c. the clans

[614] The clan organization among the Kazakhs is very well preserved.

563 Known clan names of the Middle Horde are the following: Chakchat,
619 Chardzhid, Turtul, Karaul, Karakisak, Kandzhagali, Achai, Tarakli,
614 Kulchan-Argin, Kundelen, Usun, Tanabuga, Karabalik-Kipchak.

3. Economy

563 The Kazakhs are still nomads. The rear camels, horses,
233 sheep and goats. In contrast to the Eastern Turks who live in
433 brick and mud houses, they live in felt tents. The Kazakhs are
[342] famous horse and camel breeders. Sheep play the most important role as sources of wool and meat. Like the Kirghiz and the Mongols, the Kazakhs have carefully explored, selected and defended summer pastures and protected valleys for the winter time.

563 The Kazakhs are very proud and independent. They dislike
181 any political supervision and are known to have avoided tax collectors by crossing the borders to Mongolia or Soviet Russia.

563 4. Literature
538 The Kazakhs have a huge folklore which is being handed down
[173] from generation to generation. They still use the Arabic script,
[212] but only a small percentage of noblemen and clergy are literate.

5. Religion

563 The Kazakhs are Moslems, belonging to the Sunna sect, but
771 they are in no way passionate and ardent believers like, for instance, the Turks of Persia. Their nomadic life obviously does not permit strict observance of the Islamic regulations.

D. The Kirghiz

101 1. History
175 Prior to the Communist Revolution the Kirghiz were called
563 Kara-Kirghiz or Burut. When the Kirghiz were driven out of Mongolia by the Kara Khitai (shortly before 924 A.D.), some moved southwest into the areas where they now live.

563 The Kirghiz are subdivided into two wings: Ong-the right one,
[619] and Sol-the left one. Like the Kazakhs, the Kirghiz have a very
[614] well preserved clan system. They are believed to represent the oldest Turkish tribe. As far as their physical characteristics are
[144] concerned, what has been said about the Kazakhs is also true for the Kirghiz; i.e., the Kirghiz also had mixed with Mongol clans at a very early period.

2. Their regulation

[147] The Kirghiz have a reputation for being extremely resistant
[181] to rigorous climate, hunger and diseases. They are well known
[212] for their wit and sense of humor. Although most are illiterate,
[538] their vivid folklore is handed down in every single tent and many Kirghiz tribesmen are able to quote thousands of rhymes from their epic songs.

3. Economy

563 Their weather-beatend faces show that they live in the moun-
361 tains. They breed horses, camels, sheep, goats and yaks. When
233

563 Huang-ho and in the surrounding villages. They are also found on
[131] one section of the road from Hsi-ning to Ho-chou. They differ considerably from the average type of Chinese Moslems. They
[142] are tall and lank. They have large and not flat noses, black and level eyes, cheekbones not prominent, long face, thick eyebrows, full black beard, retreating forehead, flattened occiput, brown but never yellow skin. Thus they are similar to the Turks of Chinese Turkestan.

2. Language and religion

[197] The most remarkable characteristic is their language which
[771] might be called a corrupt Turkish. In religion they are strict Hanafis and show great respect to their clergy. However, for the
[203] most part they are rather given to the drinking of spirits. Even
[212] the lowest classes sometimes are acquainted with the Arabic alpha-
[175] bet. They are said to have received their present form of religion from a reformer named Maming-hsin (Muhammad Amin) who taught about 1750.

3. Social organization

[193] The Salars are believed to have settled in their present habi-
[614] tat during the Yuan or Ming dynasty. They claim to have migrated from the Samarkand area. According to Schramm, who quotes General Ma Fu-hsiang, the Salars are subdivided into the "inner
[197] five clans" and into the "outer eight clans" (Chinese: kung). The latter lost their original Turkic language and now speak Tibetan.

[614] The Salars are said to preserve clan traditions very well and they do not marry anyone who does not belong to one of the Salar
[771] clans. They also have a reputation for being very fanatical Moslems, and have participated in all the Moslem uprisings of the 17th, 18th, 19th and 20th centuries.

G. The Sarigh Uighur (Chinese: Huang-fan)

[175] When Mannerheim visited the Sarigh-Uighur in 1907, there were
[361] only 100 families to be found. This small tribe lives in three villages on the northern slopes of the Nanshan Mountains, in the area of Tun-huang, Su-chou and Kan-chou. They have preserved their
[178] tribal name and their Buddhist religion but they gave up their Uighur
[212] script during the eighteenth century and adopted the Tibetan script.

[197] 1. Physical characteristics

563 Mannerheim describes them as generally having excessively
142 prominent cheek bones. But he also saw several people with oval shaped faces and not strikingly prominent cheekbones. However, in general the type of face is short and somewhat broad. Some of the women have thick noses. The mouth shows neither thin nor thick lips. The eyes are small and the distance between them is also normal. (Mannerheim obviously employs European standards when he talks about "normal" or "average.") The corners of the eyes were open and there was no inner epicanthic fold. Their hair

563 and their thin beards were black. They were of average height
[142] and no corpulent people were observed.

2. Economic activities

[233] The Sarigh-Uighurs are breeding horses, cows and sheep. Their
[556] economic position seems to be very poor. Even the richest man owns
[291] only a few horses and cows. They live in homesteads. Their clothing is Chinese in style.

H. The Tatars

1. Economic activities

Only a few thousand Tatars live in Sinkiang. They represent
[167] a very distinctive Mongoloid type of Turk. Most of the Sinkiang Tatars had fled from the former Kazan Khanate in the Volga region after the Communist Revolution. Some, however, have lived in Sinkiang since the sixteenth and seventeenth centuries.
[463] Despite their small numbers the Tatars have had remarkable in-
[441] fluence as merchants and traders due to their high education.
[871] For a long time they have been the middlemen between the Russian merchants and the Turkic tribes.

2. Religion and literature

[771] The Tatars are either Moslems or Christians. Their litera-
[538] ture is very well-developed and illiteracy is practically unknown.
[212] In Sinkiang they still use the Arabic script.

III. The Mongols of the Northwest

A. The Mongols of Sinkiang

1. General characteristics

The Mongolian tribes of Sinkiang are all Oirats or Western
[167] Mongols. Only the Chahar Mongols, who were transferred from Inner Mongolia by the Manchus, are Eastern Mongols. A small group, the so-called Uriangkhai, are considered to be Mongols, but in reality they are Turks who have adopted Mongolian as their new language.

a. tribes

[619] The Western Mongols (Oirats or Ölöts) of Sinkiang consist of
[197] two tribes: the Koshuts and the Torguts. They all speak a Western Mongolian dialect, very similar to Kalmuck, formerly spoken in the Kalmuck Socialist Republic.

b. religion and economy

[771] All Western Mongols are faithful Buddhists. They are said to
[233] be very uniform in their customs and habits. They are all pastoral
[342] nomads and breed horses, camels, sheep and yaks. They still live
[614] in collapsible tents. The clan system is well preserved.

2. Physical characteristics

563 Employing Eickstedt's terminology, the Western Mongols repre-
141 sent the Mongoloid race, and are one of its purest examples: the
142

20.

614 common migrations, and military alliance, was forced to unite into
563 a large grouping. Clan solidarity is extremely strong. Even after the old tribal constitution was abolished in Soviet Russia, workers of the same kholkhoz felt they belonged to a new clan and observed clan exogamy, which, in this case of course, had no genetic basis.

The oldest clans emerged many centuries ago and were named after totem-animals, or after famous tribal leaders (e.g., Özbeg Khan after whom the Uzbeks are named). Some of the Kirghiz clan names of totemistic origin are bugu "stag", sary bagish "yellow elk", chong bagish "great elek", etc. Among Turkomans one finds many clan names of totemistic origin, e.g., ak okuz "white ox", qara okuz "black ox", ailar "bear", burgut "hawk", due "camel", kulan "wild donkey". The aul, great-aul and clan are all connected by
[602] blood relationships real or imagined. The feeling of kinship is
[621] highly developed, and manifests itself in mutual assistance in military activities and in cases of cattle losses due to theft, disease, or lack of precipitation.

The clan assumes joint responsibilities for the welfare of the whole group, in general, and for the deeds committed by indiv-
[672] idual members of the clan. The clan also takes collective action
[681] in cases of theft or murder suffered by any clan members. Graz-
423 ing land is never individual property but belongs to the aul, great-
[565] aul or clan. Bäks and khans form the nobility which is called aq süyek "white bone" in contrast to the commoners who are called qara süyek "black bones".

563 Most members of the nobility claim to be descendants of
565 Chinghis Khan and a considerable number of the bäks and khans undoubtedly belong to the old steppe aristocracy. However, a wealthy patriarch, with a reputation for being a fair judge, who was chieftain of a numerically rich aul or great aul could become a tribal leader by popular consent.

The white bones regard marriage between white bones and black bones as unsuitable.

[567] In addition to the white bones and the black bones there exists a third stratum, consisting of descendants of slaves who were officially freed during the middle of the last century. They do not own herds, not even single heads of cattle, but function as shepherds, farmhands, servants, etc. However, some cases are known of poor farmhands (after the abolition of slavery in Russia in 1857 which affected the tribes living athwart the Sino-Russian border so that they too decided to abolish the institution of slavery about 1869) gradually acquiring cattle and therefore ascending into the higher stratum.

563 The Kirghiz are not ruled by a bäk or a khan, but by elders
622 whose functions, however, are identical with those of the bäks and khans. The elders "manap" are elected by popular acclaim, and they, in turn, fall under the leadership of an aga-manap

563 622 [554] "chief-elder". The charismatic character of such an elder is of prime importance. His wealth, his public influence, his reputation, his military ability and his moral integrity form the basis of his social status.

692 563 671 Internal order is maintained by unwritten common law. Judges act by custom and conscience alone. When a cause of action arises, the litigants, in lieu of blood-vengeance, agree to refer the matter to a court of their own choosing and to abive by its decision. Either both sides agree on one or two biks to settle the case, or each selects a bik, and a third man is chosen as arbiter. Civil and criminal law are not distinguished. Crimes are really torts, and [674] [681] can be settled out of court by compromise. Hence, the criminal is not punished; he simply pays damages, which represent a sort of compounding of the earlier lex talionis. Custom prescribes a 681 563 graded schedule of damages, ranging from a wergild (kun) of 100 horses, 1000 sheep, or 50 camels for homicide, through lesser payments in cattle for adultery, fraud, and serious personal injuries or assault, to a horse and a robe or skin for slander, breaking a finger or tooth, and minor assaults. The full wergild must be paid for killing a man, one-half for a woman or slave, and one-third for a child under ten. The circumstances and intent are not considered. However, a man pays no penalty for killing his child, slave or adulterous wife. For cattle theft, a man must restore the stolen animals and, in addition, pay twice their number as damages. For rape of an unbetrothed girl he must marry the girl, give her father the usual bride-price, and pay him a fine of nine head of cattle.

563 584 [614] Usually before a boy reaches the age of ten, his father seeks a wife for him. Neither the boy nor the girl has much voice in the transaction. Since the nomadic Turks practice strict clan exogamy the boy's father must select a girl of suitable qualifications from another clan. He then sends matchmakers to her father to arrange the bride-price "kalym". Except where a 563 583 584 brother and sister are married by exchange to a sister and brother, marriage is always by purchase. The bride-price, payable in horses, cattle, sheep and camels, varies with the means of the groom and the desirability of the bride, forty animals representing perhaps an average kalym. In return, the bride takes with her from her father's home a dowry, much inferior in value, consisting usually of a yurt, a riding horse or other animals, a chest of clothing, rugs, beddings, and other household articles. Marriage is deferred until the children attain [582] [884] their majority.

The Kirghiz Nation

1) Horde: The Right Flank (Ong)
   a) Tribe Bugu with the clans:

Tselek	Bor	Shykmayat
Torgo	Dölös	Kala
Bapa	Kongrat	Assan-tukum
Yeldün	Monguldur	Aryk-tukum
Talabai	Sayak	Küchük
Serike	Udu	

   b) Tribe Sary-bagysh with the clans:

Saru	Sayak	Mundus
Kala	Assik	Kitai
Monguldur	Dölös	Yetigün
Shykamat	Kongrat	

   c) Tribe Soltu with the clans:

Yetigün	Monguldur
Kuchu	Mundus
Saru	Assyk

   d) Tribe Edigüna with the clans:

Dölös	Mundus
Saru	Sayat (incomplete)
Kongrat	Kaba
Monguldur	Shykamat

   e) Tribe Chong-bagysh with the clans:

Askaly	Kandabas
Toro	Kosh-tamga
Macjak	Kuan-duan
Ush-tamga	

   f) Tribe Cherik ('army') with the clans:
      Ak-chubak
      Bai-chubak (incomplete)

2) Horde: The Left Flank (Sol) (no tribal names known)
   Known clan names are:
      Saru
      Besh-beren
      Mundus
      Töngtöröp
      Kuchu
      Kükürön
      Yetigün

Note: The Kirghiz who nomadize in Sinkiang belong mostly to the tribes Bugu and Soltu and Chong-bagysh.

The Uzbek Nation

563
619

1) Tribe Kytai with the clans:
   - Sary Kytai (yellow Kytai)
   - Otartshy
   - Kanjygaly (with leather straps on the saddle)
   - Kosh-tamgaly (with double tamga)
   - Tarakly (with combs)
   - Balgaly (with hammers)

2) Tribe Kypchak with the clans:
   - Tort-tamgaly (with four tamgas)
   - Sary-Kypchak (the yellow Kypchak)
   - Togus Bai (the nine principalities)

3) Tribe Kyrkmän-Yüz with the clans:
   - Kara-koily (those with black sheep)
   - Karacha (blackish)
   - Kara-sirak
   - Chapanashly

4) Tribe Yüz (hundred) with the clans:
   - Karapcha
   - Tygyryk
   - Pürchüyüs
   - Koyan Kulakly (those with rabbit ears)
   - Ergänäkli
   - Solakly
   - Khankhoja-kytaisy
   - Haji-kytaisy
   - Tuyakly (those with hoofs)
   - Sirgäli (those with ear rings)

5) Tribe Kangly
6) Tribe Naiman
7) Tribe Ming
8) Tribe Känägüs
9) Tribe Mangyt
10) Tribe Uch-ru consisting of the three groups:
    a) Mesit
    b) Yaby
    c) Tama
11) Tribe Sarai
12) Tribe Burkut
13) Tribe Allat
14) Tribe Bükhrin
15) Tribe Batash

[167] Note: It is impossible to say to which tribes or clans the Uzbeks of Sinkiang belong since most of them came to Sinkiang as single individuals and not in the form of a tribal migration.

B. The Western (Oirat) Mongols (See also IMAR, Social Structure)

563 175 After the decline of the Mongolian Empire in the 14th century, the Western Mongols (the tribes Choros, Khoit, Khoshut and Torgut) of Dzungaria established the so-called Oirat Federation. [671] Its social structure is best summarized in the Oirat codex Chaghajachi yin bichik "Book of the Judges", based on the Jassa of Chingis Khan.

563 596 [595] [671] [851] Life within the extended family is absolutely patriarchal. Although polygyny is not mentioned in the codex it is an accepted part of the society. The children of concubines are legitimate. The order of precedence among the children depends on the social status of their mothers.

563 428 After the father's death, the eldest son inherits everything, including the father's wives and concubines with the exception of his own mother. Inheritance as well as descent follows the male line.

563 614 583 Among the Western Mongols clan exogamy is strictly observed, especially among the Torguts and Khoshuts of Sinkiang. Marriage entails the payment of a bride-price of at least two horses, two cows and twelve sheep. The bride-price for an aristocratic girl is considerably higher and consists of several dozen camels, horses and sheep. If a wife is divorced she is not permitted to take with her anything which has been given to her by her husband.

563 631 According to the Chaghajachi-yin bichik the Oirats were organized into ail, khoshun (banners) and aimak. In Sinkiang there are two khoshun of Torguts, one khoshun of Khoshuts and seven khoshun of Uriangkhai. The Khoshuts of the Alashan Area and the Torguts of the Edsin Gol Area each constitute one khoshun. Each khoshun lives on land and pastures with well-defined boundaries.

563 565 The same source details the various strata of Oirat society. It subdivides the entire Oirat population into three groups. The nobility (taiji) belong to the first group, the darkhans (soldiers, warriors, flag-bearers who are tax-exempt people) belong to the second group, and the kara kürüm (plebians) belong to the third group. Cutting across these other divisions is the highly respected group of monks (Llama, Ho-brog or pandit) who are also tax-exempt.

563 565 554 The Oirat princes are subdivided into six different ranks: a) Ch'in-Wang b) Chün-Wang c) Beile c) Beise d) Chen-kuo-kung and f) Hu-kuo-kung. The Oirat taijis have four ranks, e.g., the ruling leader of a khoshun who is called khoshun-u jasak is a taiji of the first rank. Besides these ranks honorary titles exist such as: erdeni "jewel", darkhan "master", tüsiyetü "pillar, support", daiching "hero", dalai "ocean" and batur "hero" etc. [651] The Khoshun-u jasak is the ruler of his banner. Commoners pay him tribute in the form of cattle or agricultural products.

/Mongols of the Northwest/

These feelings and emotional attitudes were hardly sufficient to arouse animosity or hatred toward the Chinese but rather an unjustified and unwarranted feeling of superiority. The progressive advancement of Chinese settlers, however, who gradually took over lot after lot of their pasture land led not only to hatred but resulted in petty uprisings, so that even the Manchu government several times issued laws against Chinese advancements, which were hardly ever observed. Complaints of the Mongol leaders did not help and they were numerically too weak for military action.

Only in the case of the sedentary Mongols of the Northwest, the Monguors, such problems never arose, as they had become so strongly sinified that their tribal leaders were considered by the Chinese themselves as Chinese officials with a reputation of absolute loyalty.

D. Attitudes toward the Communist Regime

Throughout the history of the Mongols, their pattern of living, internal and external, changed very little. Their families constituted auls, the auls, clans and the clans, tribes. Besides this structural organization, there existed the military institutions of banners and leagues. The internal order was always strict and the laws and regulations hard. A leader who was not strict and hard would hardly be considered as a leader and the history of the Mongols shows that a strong leader always evoked their respect and found them to be submissive followers.

In view of this fact there is little doubt that the Mongols of the Northwest will respect the iron hand of Peking, even though probably with mixed emotions. The creation of autonomous chous (districts) populated only or overwhelmingly by Mongols might give them a certain feeling of self-determination and cultural autonomy. The organization of veterinarian stations which take care of their livestock will certainly be welcome to the nomads; the organization of a widespread educational system might be another asset for the Communists as it fosters Mongolian language and promotes literature written in Mongolian. The establishment of permanent winter sites, on the other hand, which is contradictory to Mongol customs and above all the threatening collectivization of their livestock, which is the Mongols' highest and greatest treasure, are negative aspects. This, of course, refers to the present generation only. The younger and youngest generation, subject to a very vivid and propagandistic education will undoubtedly change their attitude toward the present regime, a process for which the Khalkhas of Outer Mongolia are a classic example. (see also IMAR Handbook, same section).

III. The Chinese, Chinese Moslems and Sedentary Tibetans

An attempt at a cohesive description of popular attitudes among
